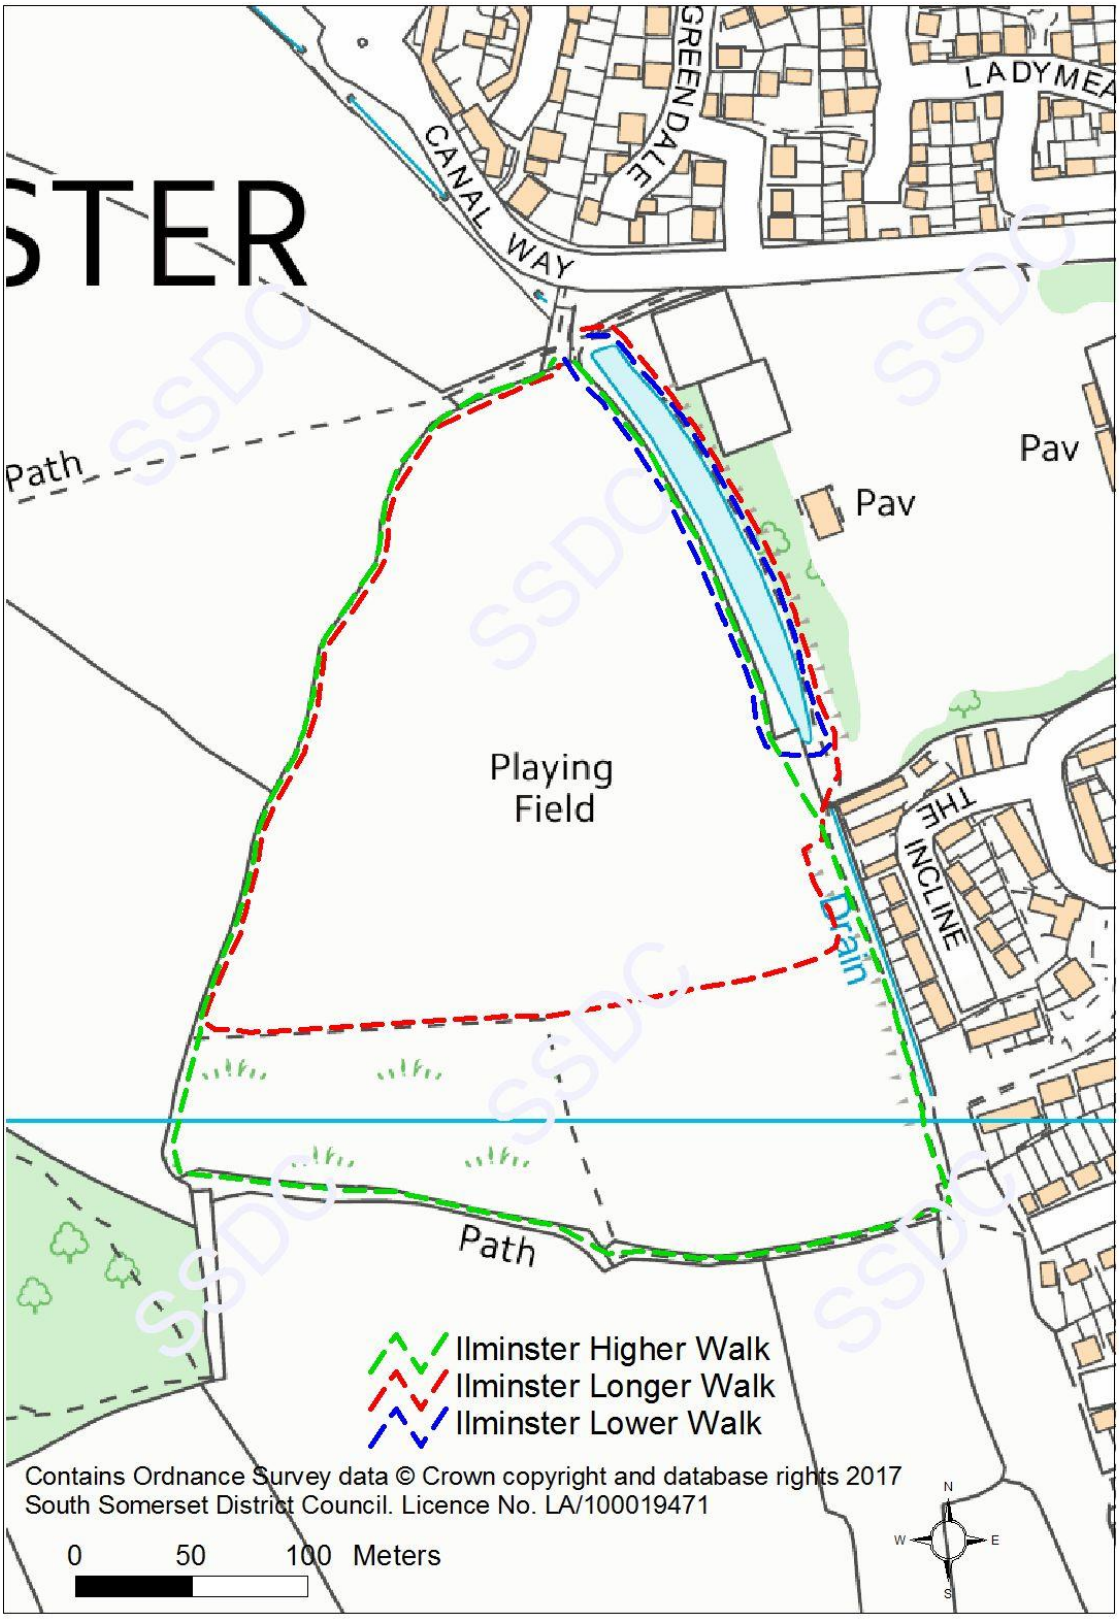
Canal Way Sports Fields Ilminster 1 Mile Grading Accessible

Starting at the Canal Way Health centre (TA19 9FE) proceed along the track to the left of the centre when facing from Canal Way. Whilst these walks are on short grass they are considered suitable in dry weather for all users.



Lower Walk

1. After entering the playing field, keep to the left hand boundary which is level and there are several seats with shade to rest if required.

2. Continue to end of the hedgerow then bear left into the Canal Way main sport and recreation area and proceed alongside the canal section which also has several seats.

3. There is a lower path for ambulant walkers and a higher area suitable for wheelchairs and mobility scooters.

4. This is a pretty area with wildlife and water lilies.

5. At the end of the canal section you have reached where you started from.

Longer Walk

For those requiring a longer duration walk, this walk can be extended around the recreation field as this is a mainly level area.

Higher Walk

This is not suitable for wheelchairs, scooter or persons with walking impairments. It encompasses Herne Hill which can be added to first section of the lower walk as follows: On reaching the end of the hedgerow section carry straight on up the fairly steep incline which leads into Herne Hill and the bluebell wood. There are many uneven and unsurfaced paths within this area. The walk returns down the right hand side of the playing field to the start point.
